SUMMARY

Applied AI practitioner who integrates large language models into real business workflows. My base is 10+ years in finance operations (credit, collections, accounts receivable) at multinational companies, which lets me identify where AI actually removes manual work and where a plain rule or script is the better answer. I build in Python on top of LLM APIs (Claude, Groq) and local models, and several of my systems with AI features are in daily use at small businesses and a cooperative. I am an applied AI and automation builder, not a machine-learning researcher: I do not train models; I integrate, prompt and connect them, and design outputs that people can check.

APPLIED AI EXPERIENCE

Independent | Remote — May 2024 – Present

Automation & AI Solutions Developer (self-employed)

In production – used daily by real organizations

CoopMora – Credit-risk monitoring with LLM-assisted analysis — In use at a cooperative

- Daily 8:30 AM pipeline that gathers Central Bank of Argentina (BCRA) credit-status changes and default and bankruptcy news via web scraping and APIs, uses an LLM (Groq) in the analysis, cross-references results with the active customer base and delivers alerts and a management report to the credit team.

Stack: Python, web scraping, APIs, Groq (LLM)

CUBO – Credit & collections ERP with an AI assistant — In production · 10 companies

- Multi-company credit & collections ERP; includes an AI agent reachable through Telegram via its API, alongside automated past-due and upcoming-invoice reminders.

Stack: Python, SQL, LLM API, Telegram API, Railway, Vercel

SECSA – Customer-account management with AI-assisted aging analysis — In use at a wholesale distributor

- Odoo-based system integrating inventory, sales and customer accounts; an LLM via the Groq API supports aging and account analysis next to a traffic-light due-date dashboard.

Stack: Python, SQL, Odoo, Groq API

Working prototypes – built for own use and on request; not commercial products

- **Resume-screening agent** – reads local PDF resumes and returns explained candidate rankings against user-defined criteria, listing met and missing requirements for each candidate to support human review.
- **Document and quote analysis agents** – analyze budgets, generate reports and compare quotes collected from the web.
- **Local-model workflows** – the same kind of document tasks running on local LLMs (Llama, Gemma).

Stack: Claude, ChatGPT, Groq; local models (Llama, Gemma)

SKILLS

LLM integration: Claude API, Groq API, ChatGPT, local LLMs (Llama, Gemma)

AI workflow design: prompt engineering, document-processing agents, explainable outputs for human review

AI-assisted development: Claude Code

Programming & data: Python (Pandas, Matplotlib, CustomTkinter), SQL (PostgreSQL, SQL Server, SQLite), TypeScript (Next.js, Prisma), web scraping, REST APIs

Business systems & BI: SAP ERP (FI/CO, AR), Odoo, Power BI (DAX), Excel VBA

Deployment: Railway, Vercel

FINANCE OPERATIONS EXPERIENCE

Dacas Corp | LATAM operation — Mar 2025 – Feb 2026
Senior Credit & Collections Analyst

- Designed and coded **Metanoia**, an ERP still used in live credit and collections operations: centralized collections, aging and KPIs and automated credit-analysis and cash-application tasks; estimated saving of **15 hours per week** of manual team work.
- Standardized LATAM credit-risk policies and portfolio monitoring with SQL and Power BI (100+ customers).

Saputo Inc. — Jul 2018 – May 2024
Senior Credit & Collections Analyst

- Designed a risk-based segmentation model that cut 60+ day past-due debt by **20%** in six months (30–60 day bucket **-30%**, early delinquency **-11%**).
- Automated management reporting in SAP and Power BI (DAX), cutting month-end close from **5 to 2 days**; built SQL cash-forecasting models.

CNH - XCMG | Machinery — Sep 2016 – Jun 2018
Credit & Collections Analyst (Semi-Senior)

- Automated account reconciliations in SAP ERP and Excel to speed up month-end close.

CCU Argentina | Consumer goods — Oct 2014 – Oct 2016
Credit & Collections Analyst (Junior)

- Automated recurring reports with Excel macros (VBA) and ERP tools.

TRAINING AND EDUCATION

Formal knowledge; listed separately from production experience.
Anthropic Academy – Claude API, Claude Code, Model Context Protocol (MCP), AI Fluency
Google – Gemini and Generative AI · **UTN** – Python · Power BI – DAX and Data Modeling
Bachelor's Degree in Business Administration – UAI — Coursework completed; thesis in progress

LANGUAGES

Spanish – Native | English – Upper-Intermediate (B2), professional working proficiency
