PROFESSIONAL PROFILE

Senior Credit & Collections Analyst with over 10 years of experience in multinational FMCG (Fast-Moving Consumer Goods), agribusiness, and machinery companies. Managed large-scale accounts receivable portfolios—from 250 active clients to Key Accounts that concentrated the company's highest credit exposure—reducing delinquency through risk segmentation, strategic negotiation, and automation using Python, SQL, and Power BI. Experienced in training analysts and developing internal management tools. Seeking to join as a Senior Credit & Collections Analyst applying data-driven risk management.

SKILLS

Credit & Collections: Credit Risk Analysis, Accounts Receivable (AR), Credit Limits, Dispute Management, Bad Debt Provisions, Cash Flow Management, KPIs (DSO, Aging), Bank Reconciliations, Account Auditing.

Data & Analytics: Python (Pandas, NumPy), SQL (PostgreSQL, SQL Server), Power BI (DAX, dashboards), Advanced Excel (Macros, VBA), Bad Debt Forecasting Models.

Systems: SAP ERP (FI/CO modules), Collections Management Platforms.

Languages: Spanish (Native), English (Upper-Intermediate, B2).

PROFESSIONAL EXPERIENCE

Senior Credit Analyst | **Georgalos** | Buenos Aires February 2026 – July 2026

– Managed an active portfolio of 250 wholesale and distribution clients, with a credit exposure of +$1,000M ARS, defining credit limits and collection strategies by risk segment.

– Led the auditing and reconciliation of complex current accounts, ensuring the integrity of financial reporting during the monthly close.

– Developed data models and KPI dashboards (DSO, Aging) used by financial management for credit decisions and cash flow forecasting.

– Acted as the team's technical reference for SAP, Advanced Excel, and the application of AI tools to the collections process.

Sr. Credit & Collections Analyst | **Dacas Corp** | LATAM March 2025 – February 2026

– Designed and developed "Metanoia" from scratch, an internal system for credit line analysis and payment application, featuring a real-time collections dashboard, KPIs, and customer debt aging, used by the department for daily management.

– Faced with disparate credit criteria across countries, led the standardization of credit risk evaluation policies at the LATAM level, unifying the regional process and reducing corporate exposure.

– Automated the data pipeline using SQL and Power BI, reducing aging report times and improving managerial visibility over accounts receivable.

Founder | **Independent Project (Software & Automation)** | Buenos Aires May 2024 – March 2025

– Developed custom process automation solutions in Python and SQL, deepening data architecture knowledge and incorporating technical capabilities currently applied in credit and collections management.

Sr. Credit & Collections Analyst | **Saputo Inc.** | Buenos Aires June 2018 – May 2024

– Started managing medium-sized accounts and, due to performance, was assigned the 4 main national retail chains after 2 years—the company's highest credit exposure—negotiating payment terms and managing highly complex disputes.

– Designed a risk segmentation model that improved the aging profile of the entire portfolio: reduced debt over 60 days past due by 20%, the 30–60 days segment by 30%, and early delinquency by 11% within 6 months.

– Redesigned and automated the reporting process in SAP and Power BI, reducing the monthly close from 5 to 2 days and eliminating manual errors.

– Developed forecasting models using SQL and Advanced Excel to anticipate bad debt risks and protect cash flow.

– Supervised and trained department interns, acting as the team's technical reference for SAP, Advanced Excel, and account analysis.

Semi Senior Credit & Collections Analyst | **CNH – XCMG** | Buenos Aires January 2016 – June 2018

– Substantially decreased past-due debt through portfolio analysis and redefinition of credit limits.

– Automated account reconciliation, accelerating the monthly close and improving the department's operational efficiency.

Jr. Credit & Collections Analyst | **CCU Argentina** | Buenos Aires August 2014 – January 2016

– Reduced past-due balances through periodic reconciliations and key account auditing.

– Automated critical reports using Excel macros and ERP, streamlining decision-making.

EDUCATION

Bachelor's Degree in Business Administration | Universidad Abierta Interamericana (UAI) 2018 – 2025

Coursework completed. Thesis in progress (expected defense: 2026).

COMPLEMENTARY TRAINING

Programming: Python (UTN).

Business Intelligence: Power BI (dashboards, DAX, data modeling).

Artificial Intelligence: Anthropic Academy — Building with the Claude API, Claude Code, Model Context Protocol (MCP), AI Fluency: Framework & Foundations | Google — Gemini and Generative AI.
