PROFESSIONAL PROFILE

Senior Credit & Collections Analyst with **over 10 years of experience** in portfolio management, credit risk assessment, and key account management. I combine deep Order-to-Cash (O2C) expertise with custom software development in Python, SQL, and Power BI to automate financial workflows and enhance management reporting.

PROFESSIONAL EXPERIENCE

Dacas Corp

Senior Credit & Collections Analyst | LATAM | Mar 2025 - Feb 2026

- Developed **Metanoia** (Python/SQL) to centralize collections, aging reports, and KPIs, automating credit analysis and cash application tasks. Achieved an estimated savings of **15 hours per week** in manual team workload.
- Standardized credit risk policies across LATAM operations, unifying credit limit criteria and cross-country monitoring using SQL and Power BI.

Saputo Inc.

Senior Credit & Collections Analyst | Jun 2018 - May 2024

- Managed the **top four national retail chains**, negotiating payment terms and resolving high-complexity commercial and billing disputes.
- Designed a risk-segmentation model that reduced 60+ day past-due debt by **20%**, the 30–60 day aging bucket by **30%**, and early delinquency by **11%** within six months.
- Redesigned and automated management reporting using SAP and Power BI, eliminating manual data entry. Built SQL-based cash forecasting models and trained department interns.

CNH - XCMG

Semi-Senior Credit & Collections Analyst | Jan 2016 - Jun 2018

Reduced past-due balances through portfolio analysis and credit limit restructuring. Automated account reconciliations to streamline month-end closing.

CCU Argentina

Junior Credit & Collections Analyst | Aug 2014 - Jan 2016

Contributed to overdue balance reduction through key account auditing and reconciliations. Automated recurring reports using Excel macros and ERP tools.

FINANCIAL CORE COMPETENCIES

Credit Risk & Limits | Accounts Receivable (AR) | Order-to-Cash (O2C) | Cash Application | Dispute Management | Account Reconciliations | Month-End Close | Cash Flow | DSO & Aging KPIs

JUAN MANUEL VARELA

Software Development & Process Automation

Selected Projects | May 2024 - Present

CUBO | Multi-tenant Credit & Collections ERP

Proprietary production software currently used by approximately 10 SMBs. Enables collections tracking, cash application, automated reporting, past-due payment reminders, and upcoming invoice alerts.

Python, SQL, Railway, Vercel.

CoopMora | Credit Risk Monitoring & Automated Alerts

Deployed on company servers and actively used by analysts and managers. Sends daily 8:30 AM alerts on Central Bank (BCRA) credit status changes, default news, and bankruptcy filings cross-referenced against the active client database. Executive reports include national and provincial public bank interest rates.

Python, Web Scraping, APIs, Groq.

AscenSort | Fault Analysis & Maintenance Tracking

Windows desktop application in production at a maintenance management intermediary. Imports and validates spreadsheets, maintains historical logs, and separates technical failures from misuse causes. Generates KPIs, charts, action tracking, and PDF/Excel reports.

Python, CustomTkinter, SQLite, Pandas, Matplotlib.

SECSA | Commercial Management & Account Analytics

Production system used by a wholesale distributor, customized from the Odoo codebase. Integrates inventory, sales, and customer accounts; features a traffic-light due-date dashboard and AI-powered aging and account analysis.

Python, SQL, Odoo Codebase, Groq API.

On Top | Web Development & E-Commerce Integration

Developed and launched a custom storefront connected to Shopify for a sports retail company, integrating the commercial catalog with the client's custom domain.

Shopify, Web Integration.

AI Agents | Document Processing & Recruitment Support

Built custom AI agents for internal and client use. Parses local PDF resumes to generate explained candidate rankings based on user criteria, highlighting met and missing requirements. Additional agents analyze budgets, generate reports, and compare web quotes.

ChatGPT, Claude, Groq | Local Models: Llama, Gemma.

ADDITIONAL TOOLS & TECHNOLOGIES

Power BI (DAX, Dashboards), Advanced Excel (VBA, Macros), PostgreSQL, SQL Server, and SAP ERP (FI - CO).

EDUCATION, TRAINING & LANGUAGES

Bachelor's Degree in Business Administration | UAI

Coursework completed; thesis in progress.

Training: Python (UTN); Power BI (DAX & Data Modeling); Anthropic Academy (Claude API, Claude Code, MCP, AI Fluency); Google (Gemini & Generative AI).

Languages: Native Spanish | Upper-Intermediate English (Professional working proficiency).
